

Marius Justus **Theiß**

Senior Finance Data Engineer · Machine Learning · Forecasting

Lohstr. 19, 58553 Halver, North Rhine-Westphalia, Germany

(+49) 151 6144-2928 | marius.theiss@dhl.com | June 2nd, 1991 | mjt91.url.lol | mjt91 | mariustheiss

"Data enthusiast with 8+ years in enterprise analytics, driving ML, AI, and forecasting initiatives. Seeking to apply technical expertise to new challenges outside of GBS."

Experience

DHL Group · Global Business Services

Bonn, Germany

Senior Finance Data Engineer

Jan. 2021 – Present

- Built production ML pipeline (LGBM/statsforecast) with MLflow tracking and auto-retraining
  - High accuracy forecasts for business critical KPIs such as EBIT, Cost, Charges, Cash Flow
  - Incorporated in finance processes with analyst in the loop approach
  - Self-built tooling that can be shared between use-cases and teams
- Co-lead a RAG AI assistant (LangChain/GPT-4 backend), serving a group of ∼1000 users
  - ChatBot answering questions about divisional policies, process descriptions or finance wiki content
  - Improving documentation landscape, user onboarding and knowledge transfer
- Architected analytics tool to auto-generate financial comments for P&L and balance sheet changes, used in divisional reporting processes
  - Comment generation based on hierarchical reporting data information
  - Flexible depth, schedules and thresholds available to comply with different user needs
- Cross-functional data project outside Finance: analyzed shipment event data (API/push-event level)
  - Prototyped a shipment data dashboard for Market Intelligence
  - Analyzed cold-chain excursions (temperature deviations) in shipment events
  - Evaluated air-to-ocean mode shift and LCL consolidation opportunities

Deutsche Post DHL · Global Business Services

Bonn, Germany

Controlling Expert

May 2018 – Dec. 2020

- Built modern financial reporting suite with dynamic inputs from IBM TM1
- Administered self-service data warehouse for 100+ business users
- Executed 10+ process optimization projects, reducing manual effort required in month-end and reporting processes

Skills

ML & AI	Time series forecasting, OpenClaw, MLflow, LangChain, RAG
Programming	Python (pandas, numpy), R, SQL, Node.js
MLOps	Docker, GitHub Actions, API development (using bruno/fastapi)
Enterprise	IBM TM1, PowerBI, SharePoint, Microsoft 365
Languages	German (native), English (fluent)

Education

Technical University of Dortmund

Dortmund, Germany

Master of Science in Business Mathematics

Oct. 2010 – Oct. 2017

- Final grade: 1.5 (German scale) · Focus: Financial Econometrics, Optimization
- Theses: M.Sc. "A Handful of Factors: The Construction of the Fama-French Five-Factor-Model for the German Stock Market" (2017); B.Sc. "Testing the Efficient Market Hypothesis for Soccer Odds in Germany" (2014)

Trivia & Outside Interests

Team Building: Acting buddy for interns and finance grow trainees. Organized weekly departmental push-up challenges before lunch.

Outside Interests: Swimming (Total Immersion Method), Chess (~1300 rapid on chess.com), aspiring Stoic.

Side Projects: Exploring LLMs, OpenClaw, and blogging/writing occasionally.
